

# INDUSTRIAL DETERGENTS

anatrace

[www.anatrace.com](http://www.anatrace.com)

High purity detergents, lipids, and custom chemistry are the hallmark of Anatrace. We also offer a variety of industrial grade detergents which are perfect for initial protein extraction and purification of membrane proteins, along with a host of other molecular biology applications.

CHAPS, CHAPSO, NDSB-256 and Nonidet P40 Substitute are among the most widely used of our industrial detergents. Industrial scale manufacturing offers the advantage of lower cost product but at the expense of homogeneity and purity found in other high purity Anatrace products such as Dodecyl Maltoside or Fos-Choline. Industrial detergents are a mixture of different molecular weight components that are primarily the proper derivative. These reliable detergents are commonly found in every lab and are highly suitable for standard applications.

PRODUCT #	DESCRIPTION
AZ314	Anzergent 3-14, Analytical Grade
B035	Brij® 35
B300	Big Chap, Analytical Grade
C316	CHAPS, Sol-Grade® & Anagrade®
C317	CHAPSO, Anagrade
D380	Deoxycholic Acid, Sodium Salt, Anagrade
H350	Hexaethylene Glycol Monoethyl Ether (C8E6), Anagrade
ND195	NDSB-195
NIDP40	Nonidet P40 Substitute
O330	Octaethylene Glycol Monododecyl Ether (C12E8), Analytical Grade & Anagrade
P300	Pluronic F-68
P350	Pentaethylene Glycol Monoethyl Ether (C8E5), Anagrade
S300	Sodium Dodecanoyl Sarcosine, Sol-Grade & Anagrade
T1001	Triton® X-100
T1003	Tween® 20

You can be assured that our line of industrial detergents will deliver consistent performance so there will be no surprises in your research. As a one-stop shop, we make purchasing easier so you can spend your time reaching for new heights.
