

Cell phones
just became
your essential
teaching tools.

MiPlatform-G2

“Selfie-Stick” for Microscopes

Capture & Share Images

- Students use their phone's camera to photograph and video microscopy fields
- Easily share images in class, on-line courses, and group projects
- Use as study aids for better retention of lab lessons
- Price enables labs to purchase one for every microscope

Engage Students

- Transforms microscope into wifi-enabled digital experience
- Improves classroom interaction and participation
- Gain instructional time by eliminating individual microscope adjustments
- Attracts attention of tech-savvy students when recruiting

Easy to Install & Use

- No optical elements
- Universal design works with all microscopes and any smartphone
- Securely attaches with adjustable grips and mounting collar
- Phone screen reduces eye and back-strain linked with microscope use
- Never update technology: as smartphones modernize, images & video get sharper with higher resolution
