Cell Guidance Systems' reagents and services enable control, manipulation and monitoring of the cell, both in vitro and in vivo. This includes **growth factors, exosomes, matrix proteins, cell culture media, cytogenetics analysis, and more.**

Exosomes: Purification, Detection,
Tracking and NTA Profiling of Exosomes
Sustained Release Growth Factors
Photo Stable Media
ETS-Embryo Media
In vitro Blastocyst Culture System
Cell Proliferation & Cytotoxicity Assay

Alternative Sealing Products for Microplates

MicronPlus sealing products for microplates overcome many drawbacks of commercially available sealing films and mats by providing **adhesive-free areas** that are not in contact with the well contents.

MicronPlus products can be custom designed to fit your application.

Samples Available!

TransIT-VirusGEN[®] SELECT Transfection Reagent

Large Scale Virus Production for Preclinical and Early Phase Clinical Trials

With performance that exceeds PEI and PEIpro[®] reagents, TransIT-VirusGEN[®] SELECT offers a simplified, cost-effective workflow, making it the superior choice for large-scale virus production.

Crystal Technology & Industries, Inc. — Freezer Racks, Cryo Boxes and Benchtop Equipment

TubeWriter[™] 360

**Automatic Labeler
For Tubes, Vials, Microplates and Other Labware**

TubeWriter[™] 360 is a **high-speed inkjet printer that prints directly on labware** to eliminate the cumbersome and time-consuming application of adhesive labels. It is designed to print on a wide variety of labware such as tubes, vials, slides, cassettes and microplates.
