CHROMSPEC™ PACKED GC COLUMNS

In 1963 the typical delivery of a packed GC column to Canadian chromatographers was between 3 and 4 weeks after the order was placed. This lengthy delay created an opportunity, if columns could be manufactured and delivered in days rather than weeks, scientists would be better able to conduct their experiments. This opportunity led to the creation of Chromatographic Specialties Inc. We've been supplying Canadian scientists with packed GC columns ever since.

CHROMSPEC Advantages

- Custom packed, in-house, to your specifications
- Quick delivery and competitive pricing
- Available in glass, stainless steel or other materials
- Wide selection of liquid phases, solid supports and packing materials
- Over 50 years experience packing GC columns
- Bilingual (French/English) customer and technical service support staff
- Our technical support team consists of experienced chromatographers who can assist with application support

Chromatographic Specialties Inc. can also help with many of your custom packing needs.

Contact us to discuss your custom needs and specifications, chances are we can manufacture it for you quickly and cost effectively.
