# TOP 10

## Reasons you need to **Modernize** your **Solvent Evaporator**

- 10 Alarm volume adjustment feature—no need to tolerate loud alarms just select your desired volume level.
- 9 Easy to operate touch screen.
- 8 Interchangeable rack sizes. One XcelVap unit-multiple racks accommodating up to 54 samples
  - GC/Eppendorf vials
  - ASE 40/60-mL vials
  - 200-mL tubes
  - 50-mL tube, 1 mL nipple
  - And many more!
- 7 Water bath level sensor with automatic shutdown protects your heater life.
- 6 User-replaceable nozzle tips eliminate high maintenance costs, manifold replacements, inconsistent results and down time.
- 5 Portrait orientation provides more room in hood on limited counter space.

- 4 More samples per rack—as many as 100 more a day!
- 3 Front water bath drain makes it easy to frequently change bath water resulting in a cleaner, properly maintained unit.
- 2 Intelligent safety features—exhaust safety alarm and shutdown feature for walk away confidence.

1

**Automatic gas pressure profiling**—gas pressure starts off low and gradually ramps up automatically for optimum speed and no splatter or cross contamination!

To receive our latest application note on pressure profiling, email: [instrum@chromspec.com](mailto:instrum@chromspec.com)

And trade-in your old N-evap or TurboVap® for an extra bonus!
