

Model C72 High Pressure UHPLC Injector

- Rated to 10,000, 15,000, or 20,000 psi
- 1/32" or 1/16" fittings
- Works with all VICI actuation options
- 4, 6, 8, and 10 port models

Many of the latest analytical techniques require systems capable of pressures up to 10,000, 15,000, or even 20,000 psi. The new C72 series injectors from Cheminert feature a proprietary rotor material and stator coating that permit these pressures. C72 injectors are available in a variety of configurations, including some models with a vertical injection port. (Consult the factory for more information.)

Actuation

The injectors use the same mounting system as the widely used Cheminert C2 series HPLC injectors. Our microelectric actuator determines accurate positioning without limit switches or customer adjustment. Computer control is facilitated via RS-232 or RS-485 interface, but it can also be controlled manually. The actuator is CE-certified, and includes an autosensing 110/230 VAC to 24 VDC universal power supply.

Specifications

Max. operating pressure	10,000, 15,000, or 20,000 psi
Configurations available	4, 6, 8, and 10 port; 1/32" and 1/16" fittings
Bore size	100, 150, or 250 micron for 1/32" fittings 150 or 250 micron for 1/16" fittings (400 micron in some configurations)
Stator material	Stainless steel with inert coating
Rotor material	Special high-strength PAEK (Valcon E3)
Microelectric actuator automation options	RS-232, RS-485 (optional), contact closure, TTL logic level signals
